cyber train

Product Overview

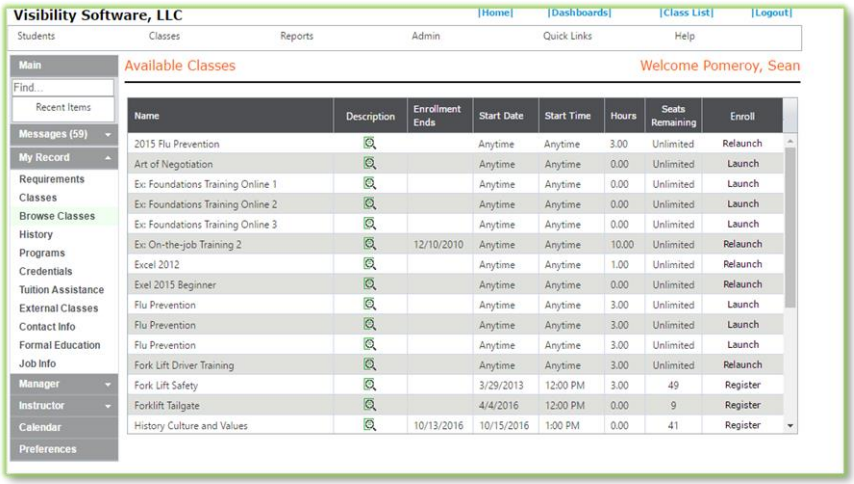
Talent Development Training Management Solution

Manage all training and build a strong talent development platform for your organization.

Benefits

With Cyber Train managing training for your organization no longer has to be an administrative nightmare. This web-based, role orientated training management system is designed to manage employee training requirements, enrollments, and certifications, easily and accurately. Intuitive and highly automated, Cyber Train is a powerful solution perfect for tracking and ensuring that your employees receive the training they need from a centralized location.

- Eliminate the need for spreadsheets and paper to track training.
- Track employee and non-employee training requirements, current enrollments, certification tracks and multi-course programs easily with automatic notifications.
- Empower supervisors, instructors and employees by making information regarding classes, course requirements, programs and certifications available via the web and not just through the HR department.



- The robust self-service portal allows access to information and functionality by the employee, supervisor, and instructors.
- Track credentials (licensures, certifications, and memberships) and renewal reminders.
- Manage and distribute course content and related materials including; documents, presentations, recordings, etc.
- Ensure employees are in compliance with job requirements through a review of certification expiration, courses due, notifications and accreditation requirements. Stop the compliance violations.
- Gain complete control and insight into all training programs with configurable dashboards.
- Develop, design and maintain necessary reports for tracking and analysis purposes with Report Writer.
- Allow employees to submit both tuition reimbursement requests and external training requests and track them throughout the automated routing and approval process.

Class Evaluation by Student			✓
Instructor Access			✓
Configurable Dashboard			✓
Multiple company tracking			✓

**Additional fees may apply*

As a Training and Development Coordinator, I was looking for a system that allowed us to have one program that captures class registrations, retains training records for internal training, allows the employee to enter their completed external training/cost, and tracks educational reimbursement. Cyber Train has allowed for all of the operations I was looking for, along with ease of use for our employees.

- Greystone Power

Cyber Train eliminates dual data entry with direct transferal of student/employee data into the system from multiple HR and payroll platforms including;

Sage	MS Dynamics GP
ADP	Epicor
Abila	JD Edwards
Deltek	And many others…

Cyber Train integrates with the following partners to expand and optimize its capabilities:

OpenSesame

Snagit®
